HISTORY...

The juniper comes from the juniper berries, which is linked to Belgium, the Netherlands and, of course, the North of France.

This spirit is made and drank in our area for a very long time. So, we've decided to associate this with beer. With this idea, we've harvested juniper berries from limestone, mixed with flavors from our region.

The « Estaminet », our French for tavern, is another symbol of the North and our culture. This tavern is a traditional restaurant where we can find a lot of beers and typical meals.

We say « Unity we stand », so there is the result of our passion.
